

ECO-EDU LEARNING-BY-DESIGN

CONSERVATION AND WILDLIFE ECO-EDU LEARNING EXPERIENCES-BY-DESIGN

Waynz World, an innovative and progressive natural sciences educational company, led by Wayne Johnson, an Edupreneur, Educator, Conservationist and Professional Nature Guide for 40-years, has formulated several exciting and innovative **Conservation and Wildlife Eco-Edu Learning Experiences-by-Design**, focusing on both the terrestrial and marine environments and everything in-between.

Our programs focus on specialised formal practical hands-on supplementary and complimentary conservation interventions and training initiatives for natural science students, researchers, professionals, prospective professional interpretive guides, university students and scholars with nature interests.

We also cater for nature enthusiasts with enquiring minds, questing minds and those with an innate desire to learn with an intrinsic yearning to be informed and enlightened, to become more aware, and learn-and-know more about the sustainability of African Conservation, Wildlife Management and Eco-Tourism in the truest sense of the word in Africa, whether it be the terrestrial environment or the marine environment.

We engage with universities, colleges, students and their associated network partners to promote our insightful conservation and wildlife Eco-Edu Learning-by-Design experiences with professional and dedicated guidance in the field from seasoned conservationist, veterinarians, researchers and professional guides.

This ethos is cultivated by an innate desire to learn and to become more educated about Africa and the African Ecosystems, its constituent members, the various relationships and related form and function of individuals, communities and populations within the terrestrial or marine ecosystem. These practical, hands-on programs are professional, comprehensive, experiential, transformational, immersive, exciting and life changing for all participants. Live, learn and experience radical transformational career development.

The premise for designing and offering these programs is to provide a supplementary avenue for a realistic assessment of one's desire to follow this as a validated career option or career change. The design is done in such a manner to give prospective participants an overview of what is to be expected in a practical, hands-on approach. These programs provide the basis from which to validate your career decision or confirm whether the study direction has in fact been correct or whether a change of career is in the making or not. The Eco-Edu programs are designed to provide a complete overview of the African Conservation, Wildlife and Eco-Tourism industries highlighting the good and the not so good aspects of each of the industries. The practical, hands-on, natural environment is our sustainable classroom and playground where we explore,

evolve and appreciate the natural world and where every aspect of functional living and operations are accounted for.

On each Career Oriented Validation Hands-On Training Program, one will be exposed to a wide range of field-based, hands-on components, various specialist researchers, research projects and a variety of Citizen Science initiatives and fully functional projects interspersed with topical lectures, workshops and wildlife interactions. These Career Oriented and Validation Training programs give you the hands-on experience to supplement theoretical learning currently being undertaken in your selected study direction or what would be desired should you change careers.

Experiential, Sustainable, Regenerative and Transformational Eco-Edu Training Experiences are our primary objective, and we believe that the best eco-tourism, wildlife and conservation training and mentoring comes through an experiential 'hands-on' practical approach to learning and 'first-hand' outcome-based eco-mentoring wildlife solutions and experiences. Step into our African Wildlife and Wilderness classrooms.

ECO-EDU LEARNING-BY-DESIGN

CONSERVATION AND WILDLIFE ECO-EDU LEARNING EXPERIENCES-BY-DESIGN

AFRICAN MARINE BIOLOGY CONSERVATION EXPERIENCES

21-Day South Africa's East Coast Marine Biology & Ecology Conservation Experience.

21-Day South Africa's Southern & West Coast Marine Biology & Ecology Conservation Experience.

28-Day Coastal Seashore Ecology, Marine Conservation and Coastal Marine Guiding Skills Experience.

AFRICAN BIRD BIOLOGY & BIRDING CONSERVATION EXPERIENCES

21-Day Bird Interpretative & Bird Biology Conservation Experience.

28-Day Immersive Bird Behavioural Research, Birding & Birdwatching Conservation Experience.

21-Day African Ornithological Research, Ethno-ornithology and Ornithotherapy Conservation Experience.

AFRICAN WILDLIFE EXPERIENCES

21-Day Africa's ICONIC Predator Conservation Experience.

21-Day Africa's ICONIC Dwindling Giants Conservation Experience.

21-Day Africa's ICONIC Big 5 and Dangerous Game Conservation Experience.

21-Day Africa's Rare, Endangered, Endemic and Enigmatic Bird-n-Beast Conservation Experience.

AFRICAN WILDLIFE MANAGEMENT CONSERVATION EXPERIENCES

21-Day Game Reserve and Wildlife Management Conservation Experience.

21-Day Wildlife Veterinary, Game Capture and Animal Care Conservation Experience.

21-Day Wildlife Management, Research and Wildlife Monitoring Conservation Experience.

21-Day Introduction to Anti-Poaching, K-9 Management and Wildlife Monitoring Conservation Experience.

**We encourage all participants to
Re-Wild the Imagination; Re-Connect with your Innate Senses; Re-Boot your Primal Essence on an
Waynz World Eco-Edu Transformational and Immersive Learning Experience.
Explore, Evolve, Adapt, Appreciate.**
