## BIRD-N-BEAST SAFARIS-BY-DESIGN

### AFRICAN BIRD-N-BEAST SAFARIS-BY-DESIGN

**“Taking Flight with Birds of a Feather that Flock Together”.**

The Waynz World team of professionals, under the expert leadership and guidance of Wayne Johnson (Professional Field Guide, Dangerous Game Specialist, Marine Guide and National Birding Guide), have formulated a number of exciting and innovative **Bird-n-Beast Safaris-by-Design** which cater for wildlife enthusiasts, interested ‘Bird-n-Beast’ explorers, small groups, student groups and families with enquiring questing minds with a yearning to learn-and-know more about the African Environment and an innate desire to be informed more about Africa’s Bird and Wildlife diversity and the African Bush holistically, its constituent members, the various relationships and related form and function of each individual and population within the ecosystem. These awareness experiences are compiled and executed professionally and are comprehensive, experiential, transformational, immersive, life-changing, educational, fun, informative and exciting.

Our primary focus is on metamorphic Bird-n-Beast Safari-by-Design Experience supported by tangible practically applicable interpretation and observable knowledge enrichment. On any of our specifically formulated Bird-n-Beast Safaris-by-Design, we provide guests with experiential, life-changing and transformational experiences where shared interests, like-minded interests, photography and ‘Bird-n-Beast enriched’ camaraderie are as vital as safety, ethics, responsibility and observable knowledge refinement through wilderness exposure, the ‘Art’ of Birding and wildlife guided conservation awareness. Every journey of discovery includes our core Bird-n-Beast Safari-by-Design expertise which is complimented by Endemic, Rare, Enigmatic and Endangered Wildlife encounters surpassing the scope of every itinerary.

Our esteemed guests are encouraged to be professional, ethical, responsible and safe users of the African Bush environment becoming wildlife ambassadors irrespective of which specialist Bird-n-Beast Safari-by-Design Experience is being embarked upon.

Experiential, Regenerative, Sustainable, Ethical and Transformational Experiences are our primary objective, and we believe that the best privately guided Bird-n-Beast Safari-by-Design experience comes through an experiential approach to enriching or refining one's knowledge with tangible 'first-hand' outcome-based observation and abundant interpretative experience.

We are passionate about all-things-natural with birding, wildlife, conservation and the African bush being our centred approach to fulfilling experiences. Our carefully crafted and curated Bird-n-Beast Safaris-by-Design are creative, dynamic, and enduring, inspired by the natural world. We view our guests as family and friends who return to travel with us repeatedly.

We do not engage in the relentless pursuit checking off target species and moving on. We take pride in our commitment to the art of sustainable and ethical travel, patient exploration and immersion, savouring intimate experiences with each Bird-n-Beast encountered while enjoying the 'wildlife-enriched' camaraderie of like-minded traveller's. Although Bird-n-Beast Safaris-by-Design are our speciality, natural history, botanical and habitat insights, scenery, scenic and landscape appreciation, culture, and geology play a powerful interpretive role in our holistic approach to wildlife, wilderness, conservation and safari exploits.

We, as a Waynz World collective are committed to responsible travel, ethical practices, ethical conservation and sustainable eco-tourism. We incorporate and use the talents, skills and insights of local guides who are engaged in further training for growth.

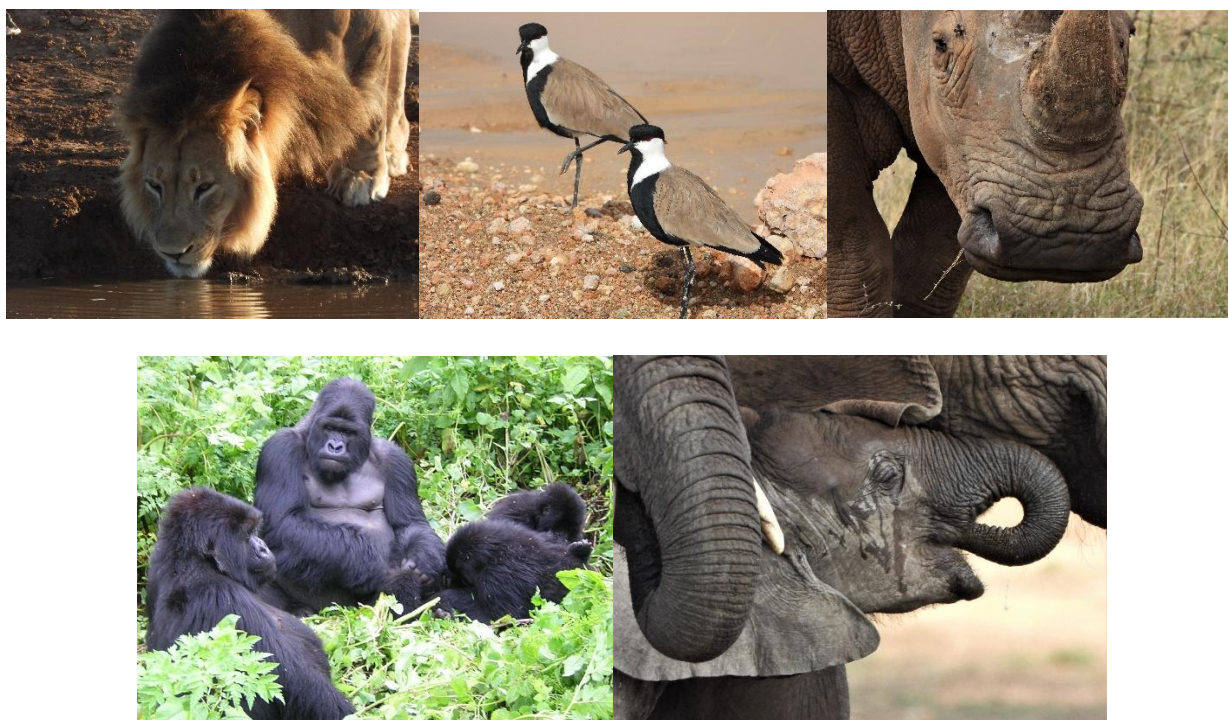

We select local eco-tourism lodges known for sustainable and ethical practices, encouraging conservator engagement, and often making meaningful contributions to conservation initiatives. We ensure our trips benefit local communities and we make donations by way of each Safari-by-Design to assist local conservation efforts which are often initiated and guided by our outreach programs for sustainable development and ethical land utilisation to best benefit of the community.

Our Bird-n-Beast Safaris-by-Design are configured specifically for people who want to spend their time birding and 'beasting' while exploring Africa's wild places aligned with individualized interests and desires. Our Safaris-by-Design are curated, operated, managed, facilitated and guided with professionalism, personalisation and with attention to detail and quality. Informal fireside discussions create and nurture a cordial and friendly atmosphere where feedback and opinions are expressed.

We prolong our stays in each locality because through experience we know that the key to a truly successful Safari-by-Design is having enough time to find most of the wildlife specialities of the region in question: missing key wildlife sightings through having insufficient time in the crucial areas is perceptibly disappointing. Travel time is limited to specific locations and is kept to a minimum as far as practicable so that you can have more time to enjoy immersive wildlife and bird sightings furthering us the opportunity to find the more elusive specialities.

We strike a balance between high quality accommodation and meal services at competitive prices. We don't cut corners if it means missing wildlife, even when we believe it is unnecessary to have 5-star luxury when something elegant, comfortable and clean, but less costly, would suffice. We maximize our time in the outdoors and would rather not to spend long hours languishing over lunch in the middle of the day at a lodge or restaurant, preferring to have healthy field lunches when they are called for to make the most of our time in the field.

Our programs have a 1:6 leader to participant ratio emphasising professional personalised care and attention and the very best privately guided experience. Our Safari leaders are highly qualified, knowledgeable educators, guide trainers and professional guides who love sharing and facilitating exceptional immersive and holistic experiences.

Our guides are expertly trained with the ability to orchestrate smooth functioning and effortless execution of 'hassle-free' Bird-n-Beast Safaris-by-Design while also providing an Afro-centric context for what you see on safari. The services of our professional safari leaders understand what you want from a 'Bird-n-Beast' Safari experience and deliver on it beyond expectation.
